Potential Beneficiaries in 2019

In Maine, there were 63,400 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 75,700 children.

75,700
children

could benefit from home visiting

Of the 75,700 children who could benefit—

Infants < 1 year	Toddlers 1-2 years	Preschoolers 3-5 years
12,900 17%	24,900 33%	37,800 50%

63,400
families

could benefit from home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Maine who met the following targeting criteria:

Of the 63,400 families who could benefit—

Notes • NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: ABC and PAT. • PAT data in ME came from state MIECHV data. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • ABC reported children served, families served, and home visits only.

The NHVRC is led by James Bell Associates in partnership with the Urban Institute. Support is provided by the Heising-Simons Foundation and the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For details about the methodology, see the *2020 Home Visiting Yearbook*.
