could benefit from
home visiting

Of the 62,200 children who could benefit—

Infants < 1 year	Toddlers 1-2 years	Preschoolers 3-5 years
11,000 18%	20,700 33%	30,400 49%

47,600
families

could benefit from
home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Alaska who met the following priority criteria:

Of the 47,600 families who could benefit—

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: EHS, NFP, and PAT. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • EHS did not require reporting on 2020 data due to the COVID-19 pandemic. The number of children served in 2019 was included as a proxy for children and families served in 2020. • NFP reported primary language of caregivers. • PAT data for child insurance status and primary language were not included.
