Nebraska

Potential Beneficiaries in 2020

In Nebraska, there were 119,100 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 153,800 children.

153,800
children

could benefit from home visiting

Of the 153,800 children who could benefit—

Infants < 1 year	Toddlers 1-2 years	Preschoolers 3-5 years
25,900 17%	52,100 34%	75,700 49%

119,100
families

could benefit from home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Nebraska who met the following priority criteria:

Of the 119,100 families who could benefit—

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: EHS and HFA. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • EHS did not require reporting on 2020 data due to the COVID-19 pandemic. The number of children served in 2019 was included as a proxy for children and families served in 2020. • HFA reported primary language of caregivers.

The NHVRC is led by James Bell Associates in partnership with the Urban Institute. Support is provided by the Heising-Simons Foundation and the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For details about the methodology, see the 2021 *Home Visiting Yearbook*.
