New Mexico

Potential Beneficiaries in 2020

In New Mexico, there were 111,500 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 148,900 children.
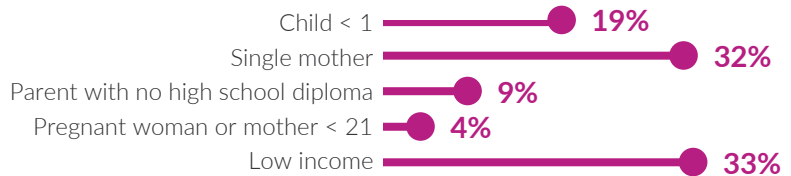

148,900 children
could benefit from home visiting

Of the 148,900 children who could benefit—

| Infants < 1 year	Toddlers 1-2 years	Preschoolers 3-5 years
24,300 16%	51,300 34%	73,300 49%

111,500 families
could benefit from home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in New Mexico who met the following priority criteria:

- Child < 1 — 19%
- Single mother — 32%
- Parent with no high school diploma — 9%
- Pregnant woman or mother < 21 — 4%
- Low income — 33%

Of the 111,500 families who could benefit—

59% of families met one or more priority criteria

28% of families met two or more priority criteria

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: EHS, Family Spirit, NFP, and PAT. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • EHS did not require reporting on 2020 data due to the COVID-19 pandemic. The number of children served in 2019 was included as a proxy for children and families served in 2020. • Family Spirit reported children served, families served, and home visits only. • NFP reported primary language of caregivers. • PAT data for child insurance status and primary language were not included.
