

# U.S. Virgin Islands

## Families Served Through Evidence-Based Home Visiting in 2020

Models implemented in the U.S. Virgin Islands included Early Head Start Home-Based Option, Healthy Families America, and Nurse-Family Partnership. Across the territory, 3 local agencies operated at least one of these models.

**1,586**

home visits provided  
*including 1,152 virtual visits*

**78**

families served

**66**

children served

### Race

### Ethnicity

Hispanic or Latino

### Caregiver education

No high school diploma

### Primary language

### Child insurance status

### Child age

# U.S. Virgin Islands

## Potential Beneficiaries in 2020

Information on potential beneficiaries was not available for U.S. Virgin Islands in 2020.

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: HFA and NFP. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with \*. • Public insurance includes Medicaid, CHIP, and TRICARE. • HFA reported primary language of caregivers. • NFP reported primary language of caregivers.

The NHVRC is led by James Bell Associates in partnership with the Urban Institute. Support is provided by the Heising-Simons Foundation and the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For details about the methodology, see the *2021 Home Visiting Yearbook*.
