Vermont

Potential Beneficiaries in 2020

In Vermont, there were 28,600 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 35,200 children.

35,200
children

could benefit from home visiting

Of the 35,200 children who could benefit—

Infants < 1 year	Toddlers 1-2 years	Preschoolers 3-5 years
5,300 15%	11,800 34%	18,100 51%

28,600
families

could benefit from home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Vermont who met the following priority criteria:

Of the 28,600 families who could benefit—

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: MECSH and PAT. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • MECSH did not report virtual home visits. • PAT data for child insurance status and primary language were not included.

The NHVRC is led by James Bell Associates in partnership with the Urban Institute. Support is provided by the Heising-Simons Foundation and the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For details about the methodology, see the 2021 *Home Visiting Yearbook*.
