home visits provided
including 1,771 virtual visits

158

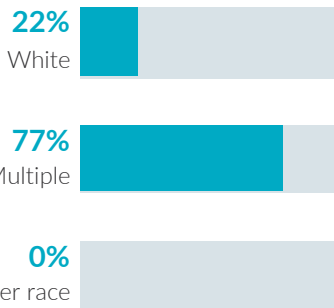

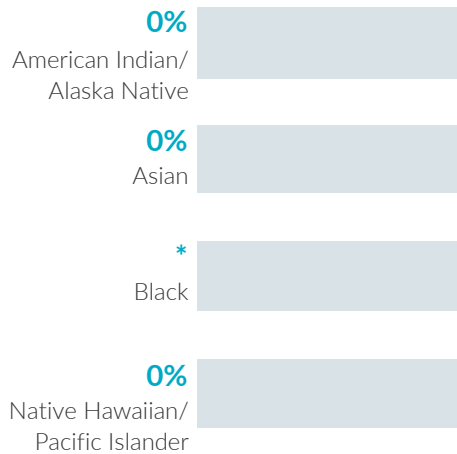

families served

160

children served

Race

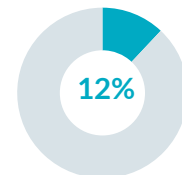

Ethnicity

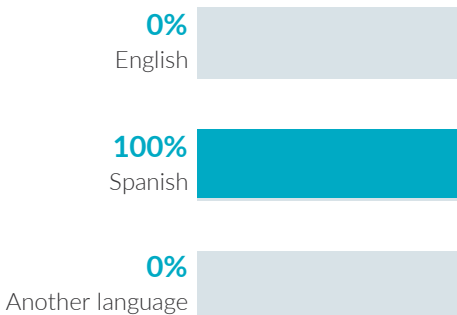

Hispanic or Latino

Caregiver education

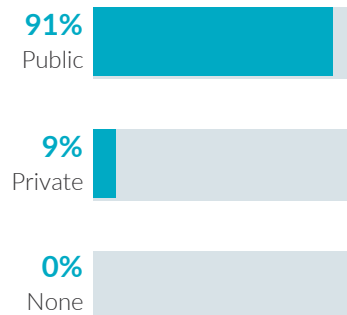

No high school diploma

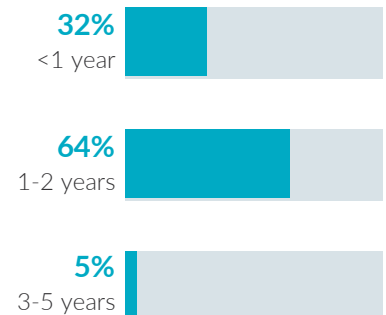

Primary language

Child insurance status

Child age

Puerto Rico

Potential Beneficiaries in 2021

Information on potential beneficiaries was not available for Puerto Rico in 2021.

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: EHS and HFA. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Public insurance includes Medicaid, CHIP, and TRICARE. • EHS data may be underreported. Data include EHS programs that provided home-based services only. EHS race and ethnicity data include children and pregnant caregivers. EHS did not report home visits. Data for child insurance status were not included. • HFA reported primary language of caregivers. Private insurance includes other forms of health insurance.

The NHVRC is a partnership of James Bell Associates and the Urban Institute. Support is provided by the Heising-Simons Foundation and previously was also provided by the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For a detailed methodology, see the *2022 Home Visiting Yearbook*.
