families served

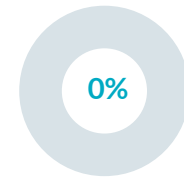

217

children served

Race

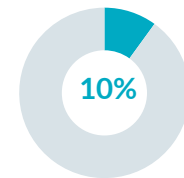

Ethnicity

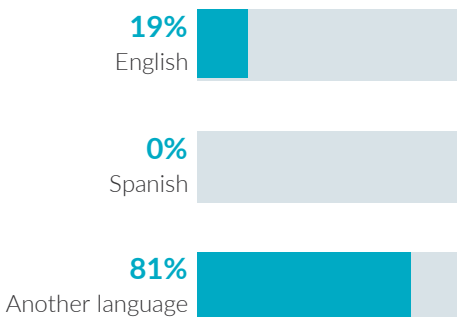

Hispanic or Latino

Caregiver education

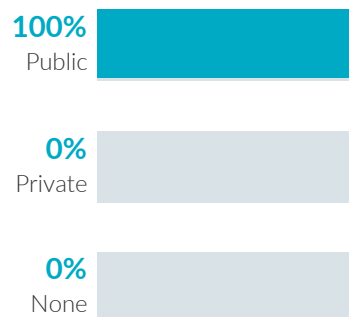

No high school diploma

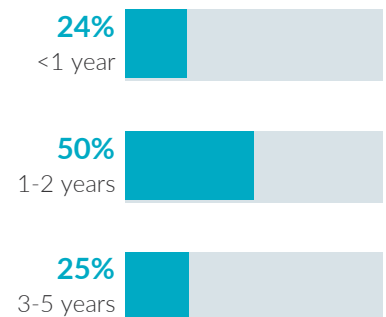

Primary language

Child insurance status

Child age

American Samoa

Potential Beneficiaries in 2022

Information on potential beneficiaries was not available for American Samoa in 2022.

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based model: HFA. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Public insurance includes Medicaid, CHIP, and TRICARE. • HFA data for private insurance includes other forms of health insurance.

The NHVRC is a partnership of James Bell Associates and the Urban Institute. Support is provided by the Heising-Simons Foundation and previously was also provided by the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For a detailed methodology, see the *2023 Home Visiting Yearbook*.
