Maine

Potential Beneficiaries in 2022

In Maine, there were 59,200 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 75,900 children.

75,900
children

could benefit from home visiting

Of the 75,900 children who could benefit—

Infants <1 year	Toddlers 1-2 years	Preschoolers 3-5 years
12,900 17%	24,400 32%	38,600 51%

59,200
families

could benefit from home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Maine who met the following priority criteria:

Of the 59,200 families who could benefit—

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: ABC and PAT. • PAT data in ME came from state MIECHV data. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • ABC reported children served, families served, total home visits, and virtual home visits only.

The NHVRC is a partnership of James Bell Associates and the Urban Institute. Support is provided by the Heising-Simons Foundation and previously was also provided by the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For a detailed methodology, see the *2023 Home Visiting Yearbook*.
