Potential Beneficiaries in 2022

In Vermont, there were 27,700 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 34,500 children.

34,500
children

could benefit from home visiting

Of the 34,500 children who could benefit—

Infants <1 year	Toddlers 1-2 years	Preschoolers 3-5 years
5,400 16%	11,700 34%	17,400 50%

27,700
families

could benefit from home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Vermont who met the following priority criteria:

Of the 27,700 families who could benefit—

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based model: PAT. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • PAT data for child insurance status and primary language were not included.

The NHVRC is a partnership of James Bell Associates and the Urban Institute. Support is provided by the Heising-Simons Foundation and previously was also provided by the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For a detailed methodology, see the *2023 Home Visiting Yearbook*.
