could benefit from home visiting

#### Of the 1,277,100 children who could benefit—

| Infants | Toddlers  | Preschoolers |
|---------|-----------|--------------|
| <1 year | 1-2 years | 3-5 years    |
| 201,100 | 436,500   | 639,500      |
| 16%     | 34%       | 50%          |

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Florida who met the following priority criteria:

#### Of the 966,100 families who could benefit—

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: Child First, EHS, HFA, HIPPY, NFP, and PAT. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • EHS data may be underreported. Data include EHS programs that provided home-based services only. EHS did not report home visits. Data for child insurance status were not included. • HFA data for private insurance include other forms of health insurance. • PAT data for child insurance status and primary language were not included.

The NHVRC is a partnership of James Bell Associates and the Urban Institute. Support is provided by the Heising-Simons Foundation. The views expressed here do not necessarily reflect the views of the foundation. For a detailed methodology, see the 2024 Home Visiting Yearbook.
