Maine

Potential Beneficiaries in 2023

In Maine, there were 59,600 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 73,900 children.

73,900
children

could benefit from
home visiting

Of the 73,900 children who could benefit—

Infants <1 year	Toddlers 1-2 years	Preschoolers 3-5 years
12,200 17%	24,400 33%	37,400 51%

59,600
families

could benefit from
home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Maine who met the following priority criteria:

Of the 59,600 families who could benefit—

NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. This State Profile includes participant data from the following evidence-based models: ABC and PAT. • Missing and unknown data were not included in calculations. • Percentages may not add to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • ABC data for child insurance status were not included. Data are reported for the ABC-Infant program. • PAT data for child insurance status and primary language were not included.

The NHVRC is a partnership of James Bell Associates and the Urban Institute. Support is provided by the Heising-Simons Foundation. The views expressed here do not necessarily reflect the views of the foundation. For a detailed methodology, see the 2024 Home Visiting Yearbook.
