About the 2026 Home Visiting Yearbook

The [2026 Home Visiting Yearbook](#) presents the landscape of early childhood home visiting across America. It features updated information from robust data sources, including 18 evidence-based home visiting models and 12 emerging models. The yearbook includes data from 2025, when the field continued to offer a mix of virtual and in-person service delivery.

Highlights

- Evidence-based home visiting was implemented in all 50 states, the District of Columbia, 5 territories, and 51 percent of U.S. counties, including counties served by 38 Tribal Maternal, Infant, and Early Childhood Home Visiting (MIECHV) grantees in 2025.
- Home visiting programs reached families in an estimated 85 percent of U.S. counties in 2025, with home visitors serving areas beyond the 51 percent of counties where programs were located.
- More than 301,000 families received evidence-based home visiting services in 2025, over the course of more than 3.1 million home visits. Approximately 11 percent of these visits were provided virtually, down from nearly 14 percent the prior year, reflecting a continued return to in-person visits.
- Over 73,000 additional families received home visiting services through 12 emerging models that provided more than 567,000 home visits in 2025.
- Nearly 22,000 home visitors and supervisors delivered evidence-based services in 2025.
- More than 16.7 million pregnant women and families (including over 21 million children) could benefit from home visiting. Of those, approximately 301,000 received services in 2025—only 1.8 percent of all potential beneficiaries or 3.9 percent of high-priority families.

Sample Email Announcement

The National Home Visiting Resource Center (NHVRC) has released its [2026 Home Visiting Yearbook](#), a nationwide and state-by-state look at early childhood home visiting. The publication presents 2025 data from evidence-based and emerging home visiting models and from the Administration for Children and Families to highlight—

- Where programs operate, the families they serve, and the families who could benefit but are not being reached
- Profiles of states, models, and Indigenous-led organizations

Users can navigate the [NHVRC website](#) to access data and download short publications, including the *Yearbook Summary*. The *2026 Yearbook* includes virtual and in-person home visit data to reflect the field's hybrid approach to delivering services. It also includes links to national data sources for maternal and child health indicators to offer insight into family well-being and the potential need for services.
