About the 2024 Home Visiting Yearbook

The [2024 Home Visiting Yearbook](#) presents the landscape of early childhood home visiting across America. It features updated information from robust data sources, including 17 evidence-based home visiting models and 11 emerging models. The yearbook includes data from 2023, when the field continued to offer a mix of virtual and in-person service delivery.

Highlights

- Evidence-based home visiting was implemented in all 50 states, the District of Columbia, 5 territories, 21 Indigenous communities, and 51 percent of U.S. counties in 2023.
- More than 280,000 families received evidence-based home visiting services in 2023, over the course of more than 2.8 million home visits. Approximately 23 percent of these visits were provided virtually, down from nearly 44 percent the prior year, reflecting a continued return to in-person visits.
- Over 38,000 additional families received home visiting services through 11 emerging models that provided more than 489,000 home visits in 2023. More than a quarter of these visits were provided virtually.
- More than 20,000 home visitors and supervisors delivered evidence-based services nationwide in 2023.
- More than 17.1 million pregnant women and families (including over 22 million children) could benefit from home visiting. Of those, approximately 280,000 received services in 2023—only 1.6 percent of all potential beneficiaries or 3.6 percent of high-priority families.
- In 2023, the federal Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program helped fund services for more than 62,000 families in states, the District of Columbia, territories, and Indigenous communities—a portion of the total families served by home visiting that year. Of the more than 810,000 home visits provided, almost one-third were delivered virtually.

Sample Email Announcement

The National Home Visiting Resource Center (NHVRC) has released its [2024 Home Visiting Yearbook](#), a nationwide and state-by-state look at early childhood home visiting. The publication presents 2023 data from evidence-based and emerging home visiting models and from state agencies and the Administration for Children and Families to highlight—

- Where programs operate, the families they serve, and the families who could benefit but are not being reached

- Profiles of states, models, and Indigenous-led organizations
- Services delivered by state awardees and tribal grantees of the Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

Users can navigate the [NHVRC website](#) to access data and download short publications, including the *Yearbook Summary*. The *2024 Yearbook* includes virtual and in-person home visit data to reflect the field's hybrid approach to delivering services. It also includes links to national data sources for maternal and child health indicators to offer insight into family well-being and the potential need for services.
