Virginia

Families Served Through Evidence-Based Home Visiting in 2017

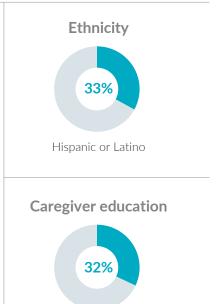

Models implemented in Virginia included Early Head Start Home-Based Option, Healthy Families America, Home Instruction for Parents of Preschool Youngsters, Nurse-Family Partnership, and Parents as Teachers. Statewide, 58 local agencies operated at least one of these models.

Potential Beneficiaries in 2017

In Virginia, there were 471,700 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 598,100 children.

598,100 children

could benefit from home visiting

Of the 598,100 children who could benefit—

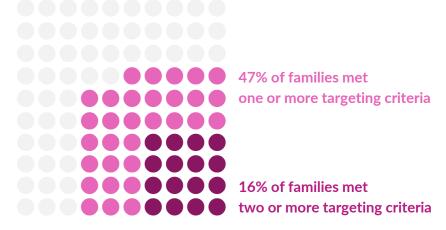

Infants	Toddlers	Preschoolers
< 1 year	1-2 years	3-5 years
98,600	201,900	297,500
16%	34%	50%

471,700 families could benefit from home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in Virginia who met the following targeting criteria:

Of the 471,700 families who could benefit—

Notes • Percentages may not add up to 100 due to rounding. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • EHS data may be underreported. Data include EHS programs providing home-based services only, not programs providing both home-based and center-based services. EHS race, ethnicity, and primary language data include children and pregnant caregivers. EHS does not report home visits or families served. The number of children served was included as a proxy for families served. • HFA reports primary language of caregivers. • HIPPY public insurance also includes Early and Periodic Screening, Diagnostic and Treatment. • NFP includes MIECHV and non-MIECHV data for children served, families served, and home visits. All other data reflect participants receiving NFP services through MIECHV funding only. • PAT reports race and ethnicity of children. PAT primary language data are not included.

The NHVRC is led by James Bell Associates in partnership with the Urban Institute. Support is provided by the Heising-Simons Foundation and the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For details about the methodology, see the 2018 Home Visiting Yearbook.
