Potential Beneficiaries in 2018

In South Dakota, there were 55,700 pregnant women and families with children under 6 years old not yet in kindergarten who could benefit from home visiting. These families included 71,300 children.

71,300
children

could benefit from
home visiting

Of the 71,300 children who could benefit—

Infants < 1 year	Toddlers 1-2 years	Preschoolers 3-5 years
12,300 17%	23,700 33%	35,300 50%

55,700
families

could benefit from
home visiting

Many home visiting services are geared toward particular subpopulations. The NHVRC estimated the percentage of families who could benefit in South Dakota who met the following targeting criteria:

Of the 55,700 families who could benefit—

Notes • NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. • Percentages may not add up to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with *. • Public insurance includes Medicaid, CHIP, and TRICARE. • Low income is defined as family income below the federal poverty threshold. • Single mothers include single, never married mothers or pregnant women. • EHS data may be underreported. Data include EHS programs providing home-based services only. EHS race, ethnicity, and primary language data include children and pregnant caregivers. EHS does not report home visits or families served. The number of children served was included as a proxy for families served. • PAT data for child insurance status and primary language are not included.

The NHVRC is led by James Bell Associates in partnership with the Urban Institute. Support is provided by the Heising-Simons Foundation and the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For details about the methodology, see the *2019 Home Visiting Yearbook*.
