

# Virgin Islands

## Families Served Through Evidence-Based Home Visiting in 2018

Models implemented in the Virgin Islands included Early Head Start Home-Based Option, Healthy Families America, and Nurse-Family Partnership. Across the territory, three local agencies operated at least one of these models.

**542**

home visits provided

**67**

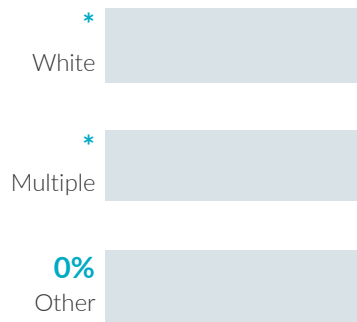

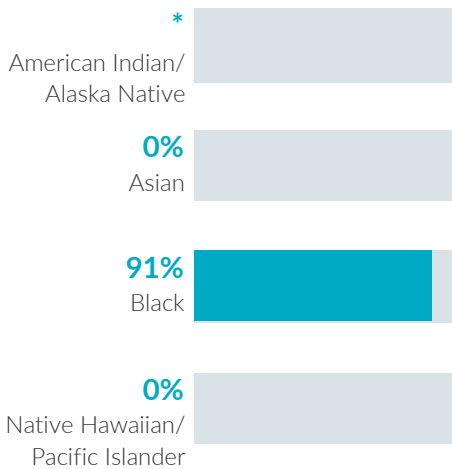

families served

**49**

children served

### Race

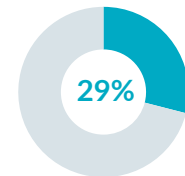

### Ethnicity

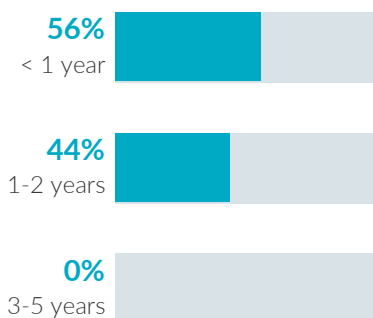

Hispanic or Latino

### Caregiver education

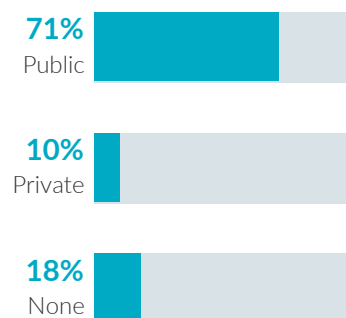

No high school diploma

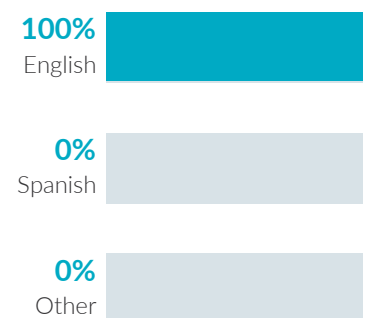

### Child age

### Child insurance status

### Primary language

# Virgin Islands

## Potential Beneficiaries in 2018

Information on potential beneficiaries was not available for the Virgin Islands in 2018.

Notes • NHVRC State Profiles present data provided by evidence-based models, which include both MIECHV and non-MIECHV data. • Percentages may not add up to 100 due to rounding. • To protect confidentiality, race and ethnicity categories with 10 or fewer participants were replaced with \*. • Public insurance includes Medicaid, CHIP, and TRICARE. • EHS programs in USVI offer a combination of service options. EHS data are not included because home-based service data cannot be isolated from statewide data. • HFA reports primary language of caregivers.

The NHVRC is led by James Bell Associates in partnership with the Urban Institute. Support is provided by the Heising-Simons Foundation and the Robert Wood Johnson Foundation. The views expressed here do not necessarily reflect the views of the foundations. For details about the methodology, see the *2019 Home Visiting Yearbook*.
